C. J. BRIGGS, R. M. NISBET, AND W. W. MURDOCH. Coexistence of Competing Parasitoid Species on a Host with a Variable Life Cycle 341
TOSHIYUKI NAMBA AND SATOSHI TAKAHASHI. Competitive Coexistence in a Seasonally Fluctuating Environment. II. Multiple Stable States and Invasion Success 374

AUTHOR INDEX FOR VOLUME 44 403

THEORETICAL POPULATION BIOLOGY

Information for Authors

Theoretical Population Biology publishes papers on the theoretical aspects of the biology f populations, especially in the areas of ecology, genetics, demography and epidemiology. 'he main emphasis will be on developments of the theory but experimental results directly npinging on the theory may be accepted for publication. Manuscripts may be submitted to ny one of the Editors or Associate Editors at the addresses listed on the inside front cover.

Original papers only will be considered. Manuscripts are accepted for review with the nderstanding that the same work has not been and will not be nor is presently submitted lsewhere, and that its submission for publication has been approved by all of the authors nd by the institution where the work was carried out; further, that any person cited as a ɔurce of personal communications has approved such citation. Written authorization ıay be required at the Editor's discretion. Articles and any other material published in *'heoretical Population Biology* represent the opinions of the author(s) and should not be ɔnstrued to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for ublication, copyright in the article, including the right to reproduce the article in all forms nd media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any ɛasonable request by the author for permission to reproduce any of his or her contributions ɔ the journal.

Form. Manuscripts should be typewritten and double-spaced throughout (including ıbles, footnotes, references, and figure captions); the original typescript should be prepared n one side of a good grade of $8\frac{1}{2} \times 11$ inch white paper, with 1-inch margins on all sides. ſimeographed or duplicated manuscripts will be accepted *if they are indistinguishable from ɔod typed copies.*

Submit *three* (3) *complete copies* (the original plus two duplicates) in order to expedite rocessing of the manuscript. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s), nd affiliation(s); at the bottom of the page type a short running head title not exceeding 5 characters (including spaces), and the name and complete mailing address (including zip ɔde) of the person to whom proofs should be sent. *Page 2* should contain a short abstract, ɒproximately 100 to 150 words in length.

Authors will be charged for pages in excess of eight per issue.

Headings. The organization of the paper must be clearly indicated by appropriate ɛadings and subheadings.

Abbreviations. Do not use final periods after abbreviations of measure (cm, sec, kg, etc.) ı text or in tables except for "in." (inch). Use the American Chemical Society *Style Guide*,)86, as a reference.

Symbols. Do not underline letters that represent mathematical symbols; these will be ɔutinely set in *italic* type.

Equations. Number equations consecutively, with the number placed in parentheses to ıe extreme right of the equation. Refer to equations as Eq. (3) or simply (3), except at the ɛginning of a sentence, when the word Equation should be spelled out. Punctuate equations ı conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes cc secutively, double-spaced, on a separate sheet of paper in the order of their appearance the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript 1, 2, e

Tables. Number tables consecutively with Roman numerals in order of their appearar in the text. Type each table, double-spaced throughout, on a separate sheet, avoid verti rules. Supply a short descriptive title below the table number. Type table footnotes, letter *a*, *b*, etc., at the end of the table.

Figures. These should be numbered with Arabic numerals and should be mention consecutively in the text. Legends are to be typed together on a separate sheet.

It is essential that all illustrations be drawn with a lettering set, and therefore in finish form ready for reproduction. Lettering on the original drawing should be large enough to legible after reduction to one-third. Graphs should be plotted with black India ink on lig blue coordinate paper, no larger than $8\frac{1}{2} \times 11$ inches, with coordinates properly labeled; g lines that are to show should be inked in black. Photographs should be submitted as glos prints (5×7 or 8×10 inches) and not marred by staples, paper clips, or pencil mar Original drawings no larger than $8\frac{1}{2} \times 11$ inches are preferred.

References. These may be cited in the text, as, e.g.: Doe (1980) has observed that (Doe, 1981); (Doe *et al.*, 1982); (Doe, 1983, p. 250). Suffixes a, b, etc., should be us following the date to distinguish two or more works by the same author(s) in the same ye e.g., Doe, 1984a,b. Literature citations in the bibliography should be arranged alphabetica according to the surname of the author. Order of items: author(s), date of publication, ti of article or book, journal name, volume number, inclusive pages, publisher and city (books only). Journal abbreviations should follow the style of *Chemical Abstracts Serv Source Index*, 1985.

Author's alterations in excess of 10% of the cost of composition will be charged to t author.

Reprints. Fifty reprints of each article will be supplied free of charge. Additional repri can be ordered on the form accompanying the proofs.

Personal Computer Disks. Manuscripts may be submitted to *Theoretical Populat Biology* on personal computer disks after the manuscript has been accepted and after revisions have been incorporated onto the disk. Label the disk with the type of compu used, the type of software and the version number, and the disk format. All tabular mater will be typeset conventionally. Art must be prepared as camera-ready copy; see the secti on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be suppli Academic Press will not accept disks without accompanying printouts of all files on the di File names must clearly indicate the content of each file. The manuscript will be edit according to the style of the journal, and the proofs must be read carefully by the auth Disks that are not translatable or economical to process will not be used. The publish reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please cont the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Stre Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-68
